42. Further Description of Important Features This attractive house has two front doors with a two bay porch of cut-out wood. The 6/6 DHS have flat lintels and sills with shutters. The frieze is dentillated with paired brackets. There are quarter fan windows in the attic gables. The windows in the rear once had a porch to the east. The inside once had three closed stairways. One went to the hired hand's room. The plain wide woodwork and the plain mantels in each of the downstairs rooms are impressive. The fireplaces have flanking cupboards in both down parlors. 43. History and Significance This house was built by Peter Schrock, a minister in the Augspurger church from 1832 to 1887 when he died. The land was sold to him in 1864, and it is the only farm in the grouping that is still owned by a Mennonite family. Peter Schrock was an immigrant from Nancy, France. He came to Butler County in 1830 before the Hessian group arrived. His son, Peter, Jr., was living on the farm in 1875. 44. Description of Environment and Outbuildings The old bank barn with a date of 1878 and walls of linestone was torn down in the summer of 1982. On the farm near the road to the south are condominiums that were built in the past year. 45. Sources of Information Mennonites of Butler County, 1916. Atlases of 1836, 1855, 1875, 1895, 1914. CHRISTIAN AUGSPURGER AMISH MENNONITE SETTLEMENT OF BUTLER COUNTY, OHIO

Verbal Boundary Description and Acreage

Peter Schrock, Jr. Farm (#7)

Bounded on the west by a tree row, bounded on the north by a chain link fence, bounded on the east by a driveway, bounded on the south by the crest of a ridge.

Less than one acre.

Note: the area immediately to the south and northeast of this property has been extensively subdivided, adversely affecting the farm setting of the house. In addition the drastically altered barn, a new circular blacktop driveway, and new garage are immediately to the east of the house. It was therefore decided to nominate the house and brick smokehouse to the rear only, since they alone retained their historic integrity. The driveway referred to above and in the verbal boundary description is shown on the U.S.G.S. map, and the ridge crest is contour line 650' on the map. The chain link fence and tree row (poplar) appear in photo #27 and are useful for defining the "yard" for the house. The tree row is about 35' west of the house and the fence is about 30' to the rear of the rear wing. Straight lines extended from the fence and tree row intersect the southern and eastern boundaries.
